INTRODUCTION

Good morning/afternoon/evening. My name is _____. I am here on behalf of MSR, a Research Agency in Myanmar. I am here to learn about how people in this neighbourhood feel about some important social and environmental issues and also to understand people's media habits and needs. We would like to talk to you and other people in your neighbourhood about these matters.

You were chosen randomly, like picking a mango out of a basket without looking, and your help in answering our questions is important and voluntary.

If you agree to take part, I will ask you questions about your media habits and your awareness and perception about some social and environmental issues. There are no right or wrong answers to these questions, I am only interested in your own view or experiences.

We intend to use your responses for research purposes only. Your identity will be kept confidential and your responses will not be credited to you, which means we will remove anything that is likely to identify you as taking part in this study, such as names and villages. Your answers to my questions will be combined with answers from many other people, to avoid your responses being identified as yours.

You can decide not to answer any question that you do not want to, you can stop the interview at any time without explanation, or you can request that your answers are removed from the research at any time. You will not be penalized if you decide not to participate.

The questions will ask you about extreme weather events, but are not directly related to the recent extreme weather which has recently affected Myanmar. If you are not happy to discuss issues such as these, please let us know at any point and we will terminate the interview.

The interview will take about 60 minutes.

Do you understand what I have just explained? (circle): Yes/No

Do you want to ask me any questions about the interview at this time? (circle): Yes/No
